What is my prescription drug coverage?

As part of your Scott and White Health Plan (SWHP) coverage, you have a prescription drug benefit. This document will help you understand your prescription drug benefit and the SWHP formulary.

Not every prescription drug benefit is the same. The best way to figure out your prescription drug coverage is to review your [Evidence of Coverage](#) or call the SWHP Customer Service department at (800) 321-7947.

What is the Scott & White Health Plan formulary?

A formulary is a list of covered drugs selected by SWHP in consultation with a team of health care providers. The list represents the prescription drugs believed to be a necessary part of a quality treatment program. SWHP will generally cover the drugs listed on the formulary as long as the drug is medically necessary and plan rules are followed. The list contains both brand-name and generic medications and is updated regularly.

This SWHP formulary is an open formulary. This means that preferred drugs listed in this document are covered under your prescription benefit. Drugs not listed on the formulary are considered Non-Formulary unless excluded by your plan benefit. Non-formulary drugs may require prior authorization or may be subject to clinical edits. Formularies continually change to reflect the most recent advances in drug therapy. Therefore; this list is not inclusive and does not guarantee coverage.

The formulary is tiered meaning there are different copayment levels for drugs on different levels.

Tier 1 (T1): generally preferred generic medications

Tier 2 (T2): generally preferred brand-name medications

Tier 3 (T3): generally non-preferred brand-name and generic medications

The formulary may change because we review new medical information regarding current drugs listed as well as new drugs recently approved by the FDA.

How was the formulary created and how are new medications reviewed?

The SWHP Pharmacy and Therapeutics (P&T) Committee meets regularly to review new drugs approved by the FDA and new information regarding drugs that are already on the formulary. The Committee is primarily made up of physicians, pharmacists, and nurses.

It reviews information and scientific evidence concerning safety, effectiveness, and current use in therapy.

Does the formulary ever change?

Since the P&T Committee meets regularly and reviews new information, the formulary may change. Below are some possible reasons the formulary could change:

- Generic forms of the brand drug become available. The brand-name medication may be subject to a higher copayment and possibly a penalty. The generic medication may be covered at the lower copayment.
- New drugs may be added by the P&T Committee.
- A drug may be withdrawn from the market by the FDA.
- A drug becomes available without a prescription (becomes over-the-counter), then the drug may be removed from the formulary. Often, drugs available over-the-counter are not covered under the prescription benefit.

How am I notified of changes to the formulary?

You can find the SWHP formulary on our website at <https://ers.swhp.org/>. On the website, the formulary is updated quarterly (every 3 months), and the Formulary Changes document is updated monthly. The Formulary Changes document outlines changes made to the formulary. The Formulary Changes document is meant to notify members of changes to the formulary that occur between formulary updates. If you have any questions, or wish to obtain a printed copy of the formulary or pharmaceutical management procedures, please contact SWHP Pharmacy Help Desk at (800) 728-7947.

What are brand-name and generic drugs?

SWHP covers both brand-name and generic drugs. A brand-name drug is one that is produced under the original manufacturer's brand name. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand-name drugs but the quality and effectiveness are the same. Generic drugs may differ from the brand-name drug in color, shape, flavor, or inactive ingredients. Some brand-name drugs have a generic equivalent and others do not. If a generic form of a brand-name drug becomes available, the brand-name medication may be subject to a higher copayment and possibly a penalty. The generic medication may be covered at the lower copayment.

What is generic substitution?

Generic substitution occurs when a pharmacist dispenses an FDA-approved generic drug in place of a brand name drug. Generic substitution will automatically occur at SWHP Provider Pharmacies. Prescribers may choose to use a brand name product and not allow generic substitution by indicating on the prescription "brand necessary" or "brand medically necessary." Per state law, these statements must be handwritten by the prescriber.

What are Specialty drugs?

Specialty drugs are those drugs used to treat complex or chronic conditions, and which usually require close monitoring, such as multiple sclerosis, hepatitis, rheumatoid arthritis, cancer, and other conditions that are difficult to treat with traditional therapies. Specialty drugs may be self-administered in the home by injection (under the skin or into a muscle), by inhalation, by mouth, or on the skin. Specialty drugs may also be administered by a nurse or physician in an office. These drugs may also require special handling, special manufacturing processes, and may have limited prescribing or limited pharmacy availability.

What is a therapeutic interchange?

A therapeutic interchange involves the dispensing of chemically different drugs that are considered equivalent in safety and effectiveness by the SWHP P&T Committee. For one medication to be dispensed in place of another, the prescribing physician and the member must approve of the interchange. When a therapeutic interchange program is put in place, the program will allow SWHP Pharmacies to substitute and dispense to the plan member the SWHP-approved clinically equivalent product. Products involved in the therapeutic interchange program will be indicated with a "DE" on the formulary. Please refer to the section titled "Are there any restrictions on my coverage?" for a description of the "DE" abbreviation.

What are pharmaceutical management procedures?

Pharmaceutical management procedures are processes that help manage the drug formulary in order to provide the most cost-effective therapy options. As part of such processes, restrictions (described in the following section) may be applied to certain drugs on the formulary.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** SWHP requires you or your physician to get prior authorization before filling certain drugs. *Drugs needing prior authorization are noted on the formulary by a "PA" next to the drug name.*
- **Quantity Limits:** For certain drugs, SWHP limits the amount of medication covered. Quantity limits help ensure the appropriate use of medications. Quantity limits are often applied for safety reasons (e.g. limiting products containing acetaminophen to maximum safe limits). *Drugs with quantity limits are noted on the formulary by a "QL" next to the drug name.*
- **Step Therapy:** In some cases, SWHP requires you to first try certain drugs to treat your medical condition before another drug will be covered for that condition. *Drugs with step therapy are noted on the formulary by an "ST" next to the drug name.*
- **Age Restriction:** There are certain medications which may be limited to a certain age group. *Drugs with age restrictions are noted on the formulary by an "AL" next to the drug name.*
- **Drug Exception:** A medication may require a drug exception for a variety of reasons, i.e.; may be limited to certain specialty prescribers, limited to certain pharmacies, may be a medication that is part of the therapeutic interchange program, or various other reasons. Please contact our customer service department for questions regarding these medications. *Drugs with drug exception are noted on the formulary by a "DE" next to the drug name.*
- **Gender Limit:** There are certain medications which may be limited to a certain genders. *Drugs with gender limits are noted on the formulary by a "GL" next to the drug name with an f for female and an m for male.*

How do I request an exception to the SWHP formulary?

Your physician can ask SWHP to make an exception to the formulary. There are several types of exceptions that can be requested:

- Exception to waive a coverage restriction.
- Exception to waive a limit on a drug (example: waive or increase a quantity limit).

To request an exception, your physician must submit a coverage exception form to SWHP. Both you and your physician will be notified of the approval by mail and the drug will be covered under the applicable copayment. If the request is denied, both you and your physician will be notified. You may still purchase the medication for the full price.

What drugs are not covered by my prescription drug benefit?

Please refer to your [Evidence of Coverage](#) for complete plan coverage, limitations and exclusions specific to your prescription drug benefit.

Often, over-the-counter medications and herbal products are not covered under SWHP benefit plans.

How much medication does my copayment cover and does my plan cover maintenance medications?

You can get up to a 34-day supply of medication for a single copayment. Some medications may have a quantity limit, restricting the amount of drug you can get per prescription or per copayment.

Maintenance medications (noted on the formulary by a “MN” next to the drug name) are medications that are taken over an extended period of time to treat a chronic condition. If your physician writes your prescription for a 90-day supply, you must fill your maintenance medications at a Scott & White mail order facility or at a SWHP owned facility. If you do not get a prescription for a 90-day supply you can get your maintenance medications at a retail facility (a non-SWHP owned pharmacy) or a SWHP owned pharmacy. However, higher copays will apply at retail facilities.

Maintenance Medications

The following categories are considered maintenance eligible:

- Anticonvulsants
- Bupropion, bupropion SR, bupropion XL
- Cardiovascular Medications
- Estrogen and Progestin replacement medications
- Generic selective serotonin reuptake inhibitors (SSRIs) medications
- Lithium
- Medications to treat asthma
- Medications to treat diabetes and diabetic supplies
- Medications to treat glaucoma
- Medications to treat gout
- Medications to treat osteoporosis
- Medications to treat Parkinson’s
- Potassium supplements
- Testosterone Cypionate
- Thyroid replacement medications
- Tricyclic antidepressant medications
- Urinary incontinence medications

Please refer to your [Evidence of Coverage](#) for complete plan coverage.

How can I save money on prescriptions?

Medications on the SWHP formulary generally cost less than medications not listed. A generic medication will usually be the lowest copayment option. Ask the provider or pharmacist whether generic medications are appropriate.

Be sure to take this formulary with you to each visit so that the provider knows what medication is covered.

Abbreviations

| | |
|-------------------|---------------------------------|
| T1, T2, T3 | Copayment tiers |
| MN | Maintenance medication |
| PA | Prior authorization required |
| QL | Quantity limit |
| AL | Age limit |
| ST | Step therapy required |
| DE | Drug exception |
| GL | Gender Limit (f=female, m=male) |

NOTE: When a generic form of the brand drug becomes available, the brand-name medication may be subject to a higher copayment and possibly a penalty. The generic medication may be covered at the lower copayment. The print formularies may not have the most up-to-date coverage of drugs.

Contraceptive Coverage

As specified by health care reform, women must have access to a full range of FDA-approved contraceptive methods. However, plans can use reasonable medical management to decide what birth control products are available at \$0 cost-share. For most plans coverage is as follows:

- All generic contraceptives listed on your drug formulary are available for you at \$0 cost-share. These are noted on the formulary with the following comment: "Eligible for \$0 copay"

Coverage may vary according to your plan. Please refer to applicable plan documents.

Preventative Care Medications & Medications Covered Under Health Care Reform

Preventative care medications as well as other medications covered under Health Care Reform are covered according to your plan benefits. These medications are noted on the formulary with the following comment: "Eligible for \$0 copay". Please note this list is subject to change.

Smoking Cessation Medication Coverage

All FDA approved tobacco cessation medications, including prescription and over-the-counter medications, are allowed at \$0 cost-share per the Patient Protection and Affordable Care Act (PPACA). You are limited to two smoking cessation attempts per year, up to 180 days total. Please refer to your drug formulary within this document for specific medications that are eligible.

In order to obtain this benefit, you must fill at a network pharmacy with a prescription prescribed by a health care professional (includes prescription and over-the-counter medications).

Diabetic Supplies

The preferred diabetic testing supplies include all Roche Diagnostics (ACCU-CHEK®) Products.
