What is my prescription drug coverage?

As part of your Scott and White Health Plan (SWHP) coverage, you may have a prescription drug benefit. This document will help you understand your prescription drug benefit and the SWHP formulary.

Not every prescription drug benefit is the same. The best way to figure out your prescription drug coverage is to review your *Evidence of Coverage* or call the SWHP Customer Service department.

What is the Scott & White Health Plan formulary?

A formulary is a list of covered drugs selected by SWHP in consultation with a team of health care providers. The list represents the prescription drugs believed to be a necessary part of a quality treatment program. SWHP will generally cover the drugs listed on the formulary as long as the drug is medically necessary and plan rules are followed. The list contains both brand-name and generic medications and is updated regularly.

This SWHP formulary is an open formulary. This means that preferred drugs listed in this document are covered under your prescription benefit. Coverage for drugs not listed are considered Non-Formulary unless excluded by your plan benefit. Non-formulary drugs may require prior authorization or may be subject to clinical edits. Formularies continually change to reflect the most recent advances in drug therapy therefore; this list is not inclusive and does not guarantee coverage.

The formulary is tiered meaning there are different copayment levels for drugs on different levels.

Tier 0 (T0): zero cost share preventive medications

Tier 1 (T1): preferred generic medications

Tier 2 (T2): preferred brand medications

Tier 3 (T3): non-preferred brand and generic medications

Specialty (SP): specialty medications

Non-formulary medications: medications not listed on formulary but are allowed some coverage (unless excluded)

Excluded: medications not listed on formulary and member is responsible for the entire cost of the prescription

The formulary may change because we review new medical information regarding current drugs listed as well as new drugs recently approved by the FDA.

How was the formulary created and how are new medications reviewed?

The SWHP Pharmacy and Therapeutics (P&T) Committee meets regularly to review new drugs approved by the FDA and new information regarding drugs that are already on the formulary. The Committee is primarily made up of physicians, pharmacists and nurses. It reviews information and scientific evidence concerning safety, effectiveness and current use in therapy.

Does the formulary ever change?

Since the P&T Committee meets regularly and reviews new information, the formulary may change. Below are some possible reasons the formulary could change:

- Generic forms of the brand drug become available. The brand-name medication may be subject to a higher copayment and possibly a penalty. The generic medication may be covered at the lower copayment.
- New drugs may be added by the P&T Committee.
- A drug may be withdrawn from the market by the FDA.
- A drug becomes available without a prescription (becomes over-the-counter), then the drug may be removed from the formulary. Often, drugs available over-the-counter are not covered under the prescription benefit.

How am I notified of changes to the formulary?

You can find the SWHP formularies on our website at swhp.org, which are updated monthly. To view the changes that have been made to the formularies, refer to the monthly *Formulary Changes* document posted on the website. If you have any questions or wish to obtain a printed copy of the formularies or pharmaceutical management procedures, please contact SWHP Pharmacy Help Desk at 1-800-728-7947.

What are brand-name and generic drugs?

SWHP covers both brand-name and generic drugs. A brand-name drug is one that is produced under the original manufacturer's brand name. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand-name drugs but the quality and effectiveness is the same. Generic drugs may differ from the brand-name drug in color, shape, flavor or inactive ingredients. Some brand-name drugs have a generic equivalent and others do not. If a generic form of a brand-name drug becomes available, the brand-name medication may be subject to a higher copayment and possibly a penalty. The generic medication may be covered at the lower copayment.

On the formulary, brand name drugs are capitalized (e.g. HUMALOG) and generic drugs are listed in lower-case italics (e.g., *simvastatin*).

What is generic substitution?

Generic substitution occurs when a pharmacist dispenses an FDA approved generic drug in place of a brand name drug. Generic substitution will automatically occur at SWHP Provider Pharmacies. Prescribers may choose to use a brand name product and not allow generic substitution by indicating on the prescription "brand necessary" or "brand medically necessary." Per state law, these statements must be handwritten by the prescriber.

What are Specialty drugs?

Specialty drugs are those drugs used to treat complex or chronic conditions, and which usually require close monitoring, such as multiple sclerosis, hepatitis, rheumatoid arthritis, cancer, and other conditions that are difficult to treat with traditional therapies. Specialty drugs may be self-administered in the home by injection (under the skin or into a muscle), by inhalation, by mouth, or on the skin. These drugs may also require special handling, special manufacturing processes, and may have limited prescribing or limited pharmacy availability.

What are pharmaceutical management procedures?

Pharmaceutical management procedures are processes that help manage the drug formulary in order to provide the most cost-effective therapy options. As part of such processes, restrictions (described in the following section) may be applied to certain drugs on the formulary.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include: quantity limits, prior authorization, step therapy, age limits, and others. Please refer to the legend for a complete listing of requirements.

How do I request an exception to the SWHP formulary?

Your physician can ask SWHP to make an exception to the formulary. There are several types of exceptions that can be requested:

- Exception to waive a coverage restriction.

- Exception to waive a limit on a drug (example: waive or increase a quantity limit).

To request an exception, your physician must submit a coverage exception form to SWHP. Both you and your physician will be notified of the approval by mail and the drug will be covered under the applicable copayment. If the request is denied, both you and your physician will be notified. You may still purchase the medication for the full price.

What drugs are not covered by my prescription drug benefit?

Please refer to your *Evidence of Coverage* for complete plan coverage, limitations and exclusions specific to your prescription drug benefit.

Often, over-the-counter medications and herbal products are not covered under SWHP benefit plans.

How much medication does my copayment cover and does my plan cover maintenance medications?

You can get up to a 30-day supply of medication for a single copayment. Some medications may have a quantity limit, restricting the amount of drug you can get per prescription or per copayment.

Maintenance medications (noted on the formulary by a “MN” next to the drug name) are used to treat chronic medical conditions. The prescription for the drug must be written for a three month supply of medication.

Maintenance Medications

The following categories are considered maintenance eligible:

- Anticonvulsants
- Bupropion, bupropion SR, bupropion XL
- Cardiovascular Medications
- Estrogen and Progestin replacement medications
- Generic selective serotonin reuptake inhibitors (SSRIs) medications
- Lithium
- Medications to treat asthma
- Medications to treat diabetes and diabetic supplies
- Medications to treat glaucoma
- Medications to treat gout
- Medications to treat osteoporosis

- Medications to treat Parkinson's
- Potassium supplements
- Testosterone Cypionate
- Thyroid replacement medications
- Tricyclic antidepressant medications
- Urinary incontinence medications

NOTE: Not all drugs within the category are preferred to be maintenance eligible. Only those listed with an "MN" on formulary are maintenance eligible. Please refer to your *Evidence of Coverage* for complete plan coverage.

How can I save money on prescriptions?

Medications on the SWHP formulary generally cost less than medications not listed. A generic medication will usually be the lowest copayment option. Ask the provider or pharmacist whether generic medications are appropriate.

Be sure to take this formulary with you to each visit so that the provider knows what medication is covered.

Contraceptive Coverage

As specified by health care reform, women must have access to a full range of FDA-approved contraceptive methods and plans must cover without cost sharing at least one form of contraception in each of the FDA identified methods. However, plans can use reasonable medical management within each category to determine what birth control products are available at \$0 cost-share.

- Please refer to the formulary to determine which contraceptives are available at a \$0 cost-share. These are listed on the formulary at Tier 0 (preventive drugs).
- Certain over-the-counter (OTC) contraceptives for women may also be covered at a \$0 cost-share. These must be filled at a network pharmacy with a prescription prescribed by a health care professional.

Coverage may vary according to your plan. Please refer to applicable plan documents.

Preventive Care Medications & Medications Covered Under Health Care Reform

Preventive care medications as well as other medications covered under Health Care Reform are covered according to your plan benefits. These medications are listed on the formulary at Tier 0 (preventive drugs). Please note this list is subject to change.

In order to obtain this benefit, you must fill at a network pharmacy with a prescription prescribed by a health care professional (includes prescription and over-the-counter medications).

Smoking Cessation Medication Coverage

All FDA approved tobacco cessation medications, including prescription and over-the-counter medications, are allowed at \$0 cost-share per the Patient Protection and Affordable Care Act (PPACA). You are limited to two smoking cessation attempts per year, up to 180 days total. These medications are listed on the formulary at Tier 0 (preventive drugs).

In order to obtain this benefit, you must fill at a network pharmacy with a prescription prescribed by a health care professional (includes prescription and over-the-counter medications).

Diabetic Supplies

The preferred diabetic testing supplies include all Roche Diagnostics (ACCU-CHEK®) Products.

Oral Oncology Program

Prescriptions for drugs included in the oral oncology program will be restricted to a 14-day supply for the first 2 months of therapy. Please refer to applicable plan documents for additional information.

Oral Oncology Program drugs include:

Bosulif	Jakafi	Sutent	Votrient	Zolinza
Erivedge	Nexavar	Tafinlar	Xalkori	Zykadia
Gleevec	Rubraca	Tarceva	Xtandi	Zytiga
Inlyta	Sprycel	Targretin	Zejula
