## **2018 Step Therapy Criteria**

## **ULORIC**

---

### **MEDICATION(S) SUBJECT TO STEP THERAPY**

ULORIC

### **CRITERIA**

This step therapy criteria applies to members receiving Uloric (febuxostat). The system will look back for the lifetime of the member's prescription claims history to find a previously paid claim for allopurinol. If such a paid claim is found, then automatic claim adjudication will occur with the Tier 4 copay being assessed.
