E-Visits - Online diagnosis and treatment plan for common medical conditions

No need for an appointment. No need for a drive. No time in a waiting room. Baylor Scott & White's E-Visit service is a fast, affordable way to receive care. All of your personal data is encrypted to protect your privacy. In some cases, you may need an in-person visit to receive treatment.

How does it work?

- Complete a short survey about yourself and your symptoms on the MyBSWHealth app. It takes about five minutes, depending on your condition.
- A care team member will review your answers, make a diagnosis and recommend treatment.
- You will receive your diagnosis and recommended treatment in an online response.
- Prescriptions will be sent immediately to your preferred pharmacy.

Clinicians are available 8 a.m. – 8 p.m., 7 days a week. If you finish an interview after 8 p.m., you will receive a response by the next day.

Video Visits - Visit online with a doctor, face-to-face in real time

Don't Overspend to Get the Care You Need

How do you decide when a health-related issue is an emergency? Understanding your healthcare options can save your life – and your money.

1 Visit your **Primary Care Physician** when you're sick or have a minor injury...

Your doctor knows your health history and underlying conditions. For routine illnesses and less significant injuries, many doctors' offices are open on weekends and some evenings. This can be a good alternative to more costly urgent care or emergency care centers.

...or use the **Nurse Advice Line**

Nurses are available to our members 24 hours a day, 365 days a year. Our nurses provide information about taking care of yourself at home or they can help you decide if an appointment, an urgent care visit, or an emergency room visit is best for your symptoms. To locate your appropriate Nurse Advice Line phone number, please look on the back of your member card or log in to the Member Portal.

2 If your doctor's office is closed, consider an **Urgent Care** center.

Urgent care centers typically have extended and weekend hours. Although costs are higher than primary care, urgent care copays are lower than those for emergency care.

3 Emergency Rooms

are best for treating severe and life-threatening conditions.

The wider range of services offered through emergency rooms, and the hospitals they are connected to, makes emergency care a more expensive option, but sometimes the best option for you.

It's important to understand your options, and to use your best judgment when deciding which option is right for you.

Out-of-Network Emergency Care Costs More

Scott and White Health Plan pays out-of-network emergency services according to Usual and Customary rates (industry standard), and members can be balance-billed for expenses beyond what insurance will pay. Your coverage documents contain additional information about emergency treatment and definitions of the terms, including a definition of emergency care. The coverage documents also contain information related to state-mandated consumer protections for facility-based provider charges.

To save on out-of-pocket costs, visit in-network emergency care facilities when possible.

If you need to speak to us, contact us in the way that works for you. In addition to the Member Portal, customer support is available by phone at 800-321-7947.

SWHP Disease Management

Disease Management programs are designed to improve the health of persons with chronic conditions and reduce associated costs from avoidable complications. These goals are accomplished by identifying and treating chronic conditions more quickly and more effectively, slowing the progression of those diseases. Disease Management is a system of coordinated healthcare interventions tailored to your conditions where self-care efforts can be implemented. Disease Management empowers you, working with your healthcare providers, to manage the disease and prevent complications.

SWHP members can access the program by calling 888-360-1555 or through the following link: [Member Information Center](#).

SWHP Complex Case Management

Our Complex Case Management program helps you if you have chronic conditions or complex care needs. A nurse case manager will work with you, your family, and the physician to create a plan to meet your ongoing complex care needs. Case managers advocate for you and assist you with setting goals and making a personal plan to improve your health. They can also assist with arrangements for necessary services and make referrals to, and incorporate, Disease Management programs as applicable. Case managers answer questions and educate you so you have a better understanding of your condition and plan of care. The purpose of the program is to help you get the best possible results and the greatest value from your health plan. Participation is voluntary, and there is no additional cost to you for this program.

For more information, please log in to the Member Portal, select Wellness Programs and [request a screening](#) to see if Complex Case Management is the right program for your needs.
