Important note:
Unless otherwise indicated, this policy will apply to all lines of business.
Even though this policy may indicate that a particular service or supply may be considered medically necessary and thus covered,
this conclusion is not based upon the terms of your particular benefit plan. Each benefit plan contains its own specific provisions
for coverage and exclusions. Not all benefits that are determined to be medically necessary will be covered benefits under the
terms of your benefit plan. You need to consult the Evidence of Coverage (EOC) or Summary Plan Description (SPD) to
determine if there are any exclusions or other benefit limitations applicable to this service or supply. If there is a discrepancy
between this policy and your plan of benefits, the provisions of your benefits plan will govern. However, applicable state mandates
will take precedence with respect to fully insured plans and self-funded non-ERISA (e.g., government, school boards, church)
plans. Unless otherwise specifically excluded, Federal mandates will apply to all plans. With respect to Medicare-linked plan
members, this policy will apply unless there are Medicare policies that provide differing coverage rules, in which case Medicare
coverage rules supersede guidelines in this policy. Medicare-linked plan policies will only apply to benefits paid for under Medicare
rules, and not to any other health benefit plan benefits. CMS’s Coverage Issues Manual can be found on the CMS website.
Similarly, for Medicaid-linked plans, the Texas Medicaid Provider Procedures Manual (TMPPM) supersedes coverage guidelines
in this policy where applicable.

SERVICE: Gynecomastia Surgery

PRIOR AUTHORIZATION: Required.

POLICY: SWHP covers medically necessary corrective surgery for male members 16 years of age or older
who have been diagnosed (on physical examination) with gynecomastia.

- There must be evidence that associated signs and symptoms have persisted for at least 24-
  months despite treatment or correction of any underlying causes, and have been followed by a
  physician over at least a 12-month period; AND
- Member must have BMI ≤ 30; AND
- The tissue to be removed is glandular breast tissue and not the result of obesity; AND
- No prior history of use of non-prescription and/or recreational drugs or substances that have a
  known side-effect of gynecomastia. (examples include but are not limited to the following,
  testosterone, marijuana, anabolic steroids)

Requests for coverage of surgery for gynecomastia must include:

- Medical record documentation of the presence, extent and duration of gynecomastia; AND
- Relevant medical history (e.g., pharmacy records, chromosome analysis, laboratory drug
  screen); AND
- Documentation of appropriate specialist consultation (i.e., surgeon and/or endocrinologist) to
  identify and treat or correct any underlying causes.

OVERVIEW: This document describes the evidence-based criteria used to facilitate fair, impartial, and
consistent coverage decisions regarding surgery for gynecomastia. Gynecomastia is defined as abnormal
breast development on males and not related to obesity, nor does it refer to normal male adolescent
gynecomastia which is developmental and self-resolving within 2-3 years.

**REFERENCES:** The following scientific references were utilized in the formulation of this medical policy.

SWHP will continue to review clinical evidence surrounding gynecomastia surgery and may modify this policy at a later date based upon the evolution of the published clinical evidence. Should additional scientific studies become available and they are not included in the list, please forward the reference(s) to SWHP so the information can be reviewed by the Medical Coverage Policy Committee (MCPC) and the Quality Improvement Committee (QIC) to determine if a modification of the policy is in order.
