Important note
Even though this policy may indicate that a particular service or supply may be considered covered, this conclusion
is not based upon the terms of your particular benefit plan. Each benefit plan contains its own specific provisions for
coverage and exclusions. Not all benefits that are determined to be medically necessary will be covered benefits
under the terms of your benefit plan. You need to consult the Evidence of Coverage to determine if there are any
exclusions or other benefit limitations applicable to this service or supply. If there is a discrepancy between this
policy and your plan of benefits, the provisions of your benefits plan will govern. However, applicable state
mandates will take precedence with respect to fully insured plans and self-funded non-ERISA (e.g., government,
school boards, church) plans. Unless otherwise specifically excluded, Federal mandates will apply to all plans. With
respect to Senior Care members, this policy will apply unless Medicare policies extend coverage beyond this
Medical Policy & Criteria Statement. Senior Care policies will only apply to benefits paid for under Medicare rules,
and not to any other health benefit plan benefits. CMS’s Coverage Issues Manual can be found on the CMS
website.

SERVICE: Joint Resurfacing of Hip

PRIOR AUTHORIZATION: Not Required.

POLICY: A request for Hip joint resurfacing must meet ALL of the following criteria:
1. Degenerative Arthritis in adults 65 years of age or less OR aseptic necrosis of head of femur
2. Failure of medical/conservative management
3. Active lifestyle
4. BMI < 30
5. Good bone stock, no significant osteoporosis in involved hip
6. AVN lesion, if present, < 50%
7. Cystic Femoral Head Lesions, if present, <2cm
8. Leg Length adjustments not needed
9. No active or suspected infection in or about the hip joint
10. No nerve or muscle disease that would compromise the success of the procedure
11. Surgery to be performed by Credentialed SWHP Orthopedic surgeon (Surgeon must have
privileges to perform procedure in SWHP facility)

EXCLUSIONS (Contraindications):
1. Poor bone quality (unable to support the implant, particular attention to the female population)
2. Known allergy to metal
3. Pregnancy or plans for pregnancy
4. Compromised immune system due to disease or certain medications such as corticosteroid
5. Kidney failure
6. Inability to follow post-surgery lifestyle directions, or follow-up care
7. Joint resurfacing of the shoulder

OVERVIEW: Total hip resurfacing arthroplasty (HRA) involves the removal and replacement of the
surface of the femoral head with a hollow metal hemisphere that fits into a metal cup inserted into the
acetabulum of the pelvis. HRA may be an alternative to conventional total hip replacement (THR) for
the treatment of young, active patients who have radiographic evidence of joint damage and/or
chronic pain or disability that interferes with daily activities and is refractory to conservative treatment,
and who would be expected to outlive any conventional THR prosthesis and who may require multiple revision procedures during their lifetime.

**MANDATES:** None

**CODES:**

*Important note:*

**CODES:** Due to the wide range of applicable diagnosis codes and potential changes to codes, an inclusive list may not be presented, but the following codes may apply. Inclusion of a code in this section does not guarantee that it will be reimbursed, and patient must meet the criteria set forth in the policy language.

**REFERENCES:**

The following scientific references were utilized in the formulation of this medical policy. SWHP will continue to review clinical evidence related to this policy and may modify it at a later date based upon the evolution of the published clinical evidence. Should additional scientific studies become available and they are not included in the list, please forward the reference(s) to SWHP so the information can be reviewed by the Medical Coverage Policy.
Committee (MCPC) and the Quality Improvement Committee (QIC) to determine if a modification of the policy is in order.
