

MEDICAL COVERAGE POLICY

SERVICE: Chiropractic Services

Policy Number:	214
Effective Date:	10/01/2019
Last Review:	08/22/2019
Next Review Date:	08/22/2020

Important note:

Unless otherwise indicated, this policy will apply to all lines of business. Even though this policy may indicate that a particular service or supply may be considered medically necessary and thus covered, this conclusion is not based upon the terms of your particular benefit plan. Each benefit plan contains its own specific provisions for coverage and exclusions. Not all benefits that are determined to be medically necessary will be covered benefits under the terms of your benefit plan. You need to consult the Evidence of Coverage (EOC) or Summary Plan Description (SPD) to determine if there are any exclusions or other benefit limitations applicable to this service or supply. If there is a discrepancy between this policy and your plan of benefits, the provisions of your benefits plan will govern. However, applicable state mandates will take precedence with respect to fully insured plans and self-funded non-ERISA (e.g., government, school boards, church) plans. Unless otherwise specifically excluded, Federal mandates will apply to all plans. With respect to Medicare-linked plan members, this policy will apply unless there are Medicare policies that provide differing coverage rules, in which case Medicare coverage rules supersede guidelines in this policy. Medicare-linked plan policies will only apply to benefits paid for under Medicare rules, and not to any other health benefit plan benefits. CMS's Coverage Issues Manual can be found on the CMS website. Similarly, for Medicaid-linked plans, the Texas Medicaid Provider Procedures Manual (TMPPM) supersedes coverage guidelines in this policy where applicable.

SERVICE: Chiropractic Services

PRIOR AUTHORIZATION: Not required.

POLICY:

Note: SWHP coverage of chiropractic care depends on the contract benefit language. Some plans do not cover this service. Coverage for plans subject to Medicare rules has limitations as noted in the "LCD excerpts" in the appendix.

For coverage of chiropractic care, the following criteria must be met:

1. The member has a clearly documented neuromuscular condition related to acute, or acute exacerbation due to, subluxation that may be relieved by chiropractic treatment; **AND**
2. A treatment plan is documented that includes symptoms being treated, interventions planned including frequency and duration, and treatment goals; **AND**
3. Improvement is expected within the initial month, or 12 episodes of treatment.

If no improvement is documented within the initial month or 12 episodes of treatment, additional chiropractic treatment will be considered not medically necessary.

Note: Treatment quantity limits defined in plan contracts or Medicare rules supersede the limits defined in this document.

Continued chiropractic treatments beyond those in the initial month or 12 episodes of treatment may require review for medical necessity. (See "Treatment Quantity Limit" below.)

Once therapeutic benefit has been achieved with little subsequent improvement with treatment visits, continuing chiropractic care is considered not medically necessary.

Note: for plans subject to Medicare rules, chiropractic service is specifically limited to treatment of members who have acute symptoms/signs due to subluxation or acute exacerbation/recurrence of symptoms/signs due to subluxation.

No other diagnostic or therapeutic service furnished by a chiropractor or under the chiropractor's order is covered. This means that if a chiropractor orders, takes, or interprets an x-ray, or any other diagnostic test, the x-ray or other diagnostic test, will not be covered.

MEDICAL COVERAGE POLICY

SERVICE: Chiropractic Services

Policy Number:	214
Effective Date:	10/01/2019
Last Review:	08/22/2019
Next Review Date:	08/22/2020

Exclusions:

- Chiropractic care for asymptomatic persons or persons without identifiable clinical condition is considered not medically necessary.
- Continuing chiropractic care when the condition is neither improving nor worsening is considered not medically necessary.
- Manipulation is not covered and is unproven for non-neuromusculoskeletal conditions (e.g., attention-deficit hyperactivity disorder, dysmenorrhea, epilepsy; gastro-intestinal disorders, and scoliosis: not an all-inclusive list).

Treatment quantity limit:

Medicare related plans:

- CMS recommends review for medical necessity if more than 12 chiropractic treatments are requested in a calendar month OR if more than 30 (or less – see “LCD excerpts” in appendix) chiropractic treatments are requested in a calendar year.

Commercial product limits:

- If the “Evidence of Coverage,” or plan document, does not specify an annual limit for chiropractic treatments, then requests in excess of 30 chiropractic treatments per calendar year will be subject to medical review.

Evaluation and Management services:

Only certain manipulative services/codes are covered under Medicare. Evaluation and management services are NOT covered under Medicare-related plans.

Furthermore, some plans ONLY cover manipulative treatment, thus no other services, including evaluation and management services, are covered in those situations.

For non-Medicare-related plans and plans where therapy is not limited to manipulative treatment:

New and established outpatient evaluation and management (E/M) services (CPT codes 99201-99205, 99211-99215) may be used by chiropractors when the key components (history, examination, medical decision making), as required by coding rules, are present in the clinical documentation. According to the American Chiropractic Association, it is usually inappropriate to bill an established outpatient E/M service during the same visit as chiropractic manipulative treatment because manipulative codes already include a brief pre-manipulation assessment. https://www.acatoday.org/LinkClick.aspx?fileticket=z_rnnFyWbaE%3D&portalid=60

CODES:

Important note:

CODES: Due to the wide range of applicable diagnosis codes and potential changes to codes, an inclusive list may not be presented, but the following codes may apply. Inclusion of a code in this section does not guarantee that it will be reimbursed, and patient must meet the criteria set forth in the policy language.

CPT Codes:	98940 – 98942 Chiropractic manipulative treatment spinal (All lines of business) Where benefit package permits, the following codes are applicable, EXCEPT Medicare-related lines of business: 98943 Chiropractic manipulative treatment (CMT); extra-spinal 97001-97799 Physical medicine and rehabilitation (at contracted providers)

Appendix

LCD Excerpts

Covered diagnoses are displayed in four groups in this policy, with the groups being displayed in ascending specificity. Medicare does not expect that substantially more than the following numbers of treatments will usually be required:

- **Twelve** (12) chiropractic manipulation treatments for **Group A** diagnoses.
- **Eighteen** (18) chiropractic manipulation treatments for **Group B** diagnoses.
- **Twenty-four** (24) chiropractic manipulation treatments for **Group C** diagnoses.
- **Thirty** (30) chiropractic manipulation treatments for **Group D** diagnoses.

The following number of chiropractic manipulation services per beneficiary is considered reasonable and necessary if the medical record supports the service regardless of the nature of the visit (i.e., acute injury, acute exacerbation).

- **Twelve** (12) chiropractic manipulation treatments **per calendar month**.
- **Thirty** (30) chiropractic manipulation treatments **per calendar year**.

Primary Diagnosis Codes (for CPT/HCPCS codes 98940, 98941 and 98942)

M99.00 Segmental and somatic dysfunction of head region

M99.01 Segmental and somatic dysfunction of cervical region

M99.02 Segmental and somatic dysfunction of thoracic region

M99.03 Segmental and somatic dysfunction of lumbar region

M99.04 Segmental and somatic dysfunction of sacral region

M99.05 Segmental and somatic dysfunction of pelvic region

Group A Secondary Diagnoses

G44.209 Tension-type headache, unspecified, not intractable

*M25.50 Pain in unspecified joint (MUST SPECIFY SPINE AS THE SITE)

M54.03 Panniculitis affecting regions of neck and back, cervicothoracic region

M54.04 Panniculitis affecting regions of neck and back, thoracic region

M54.05 Panniculitis affecting regions of neck and back, thoracolumbar region

M54.06 Panniculitis affecting regions of neck and back, lumbar region

M54.07 Panniculitis affecting regions of neck and back, lumbosacral region

M54.08 Panniculitis affecting regions of neck and back, sacral and sacrococcygeal region

M54.09 Panniculitis affecting regions, neck and back, multiple sites in spine

M54.2 Cervicalgia

M54.5 Low back pain

M54.6 Pain in thoracic spine

M54.89 Other dorsalgia

M54.9 Dorsalgia, unspecified

M62.40 Contracture of muscle, unspecified site

M62.411 Contracture of muscle, right shoulder

M62.412 Contracture of muscle, left shoulder

M62.419 Contracture of muscle, unspecified shoulder

M62.421 Contracture of muscle, right upper arm

M62.422 Contracture of muscle, left upper arm

M62.429 Contracture of muscle, unspecified upper arm

M62.431 Contracture of muscle, right forearm

M62.432 Contracture of muscle, left forearm

M62.439 Contracture of muscle, unspecified forearm

M62.441 Contracture of muscle, right hand

M62.442 Contracture of muscle, left hand

M62.449 Contracture of muscle, unspecified hand

M62.451 Contracture of muscle, right thigh

M62.452 Contracture of muscle, left thigh

M62.459 Contracture of muscle, unspecified thigh

M62.461 Contracture of muscle, right lower leg
