About the StrongWell Program:

We offer a judgement-free, individualized program for pregnant and postpartum women who are in recovery or want to be. StrongWell is designed to support women throughout pregnancy and up to six months after delivery. Our goal is to support a healthy pregnancy, deliver a healthy baby, and assist with social determinants of health by connecting women to community resources.

We provide each member with a Care Team consisting of a Counselor who will provide behavioral health guidance, a Certified Peer Recovery specialist who is in recovery, too, and a Nurse Educator who will answer questions concerning the combination of pregnancy and substance use.

Who Qualifies:

Any pregnant woman with current or past substance use ranging from mild to heavy. Substances include: tobacco, alcohol, marijuana, opioids, barbiturates, inhalents, meth, cocaine, stimulants and any misuse of prescription medication. This is a private, safe, judgement-free program.

Convenience:

Care Teams are available via phone, text, video call, or in person.
